

**Top Loading Series** . Built-in fridges/freezers with top opening (top loading) are designed to be specially housed in confined spaces. They offer excellent performance even in extreme temperature conditions and, due to their low energy absorption, are particularly suitable for operation with solar energy.

**Freezer Series** . All freezers are with remote cooling units (to be installed in ventilated areas)

with clean stainless steel or aluminium interiors and evaporators installed within the box.

**Home Comfort Series** . Dedicated to large campers and caravans, the combined fridge-freezers, both single-door and double-door, solve any need for large refrigerated spaces on-board. Ideal for anyone seeking the practicality, functionality and convenience of their home refrigerator.

**Winecellar Series** . Ideal for storing 32, 18 or 10 bottles of wine even for long periods at the right temperature.

**Portable Series** . They offer excellent portability features, both in terms of reduced consumption and operational silence, and in terms of range

and speed of reaching the desired temperature. Efficiency, versatility and compactness: with capacities ranging from 16 to 65 litres, they are a valid alternative to a traditional fridge/freezer.

**Special Installation Series** . Designed to be installed in compact spaces, the two new D20A and D30A drawer refrigerators/freezers represent a revolutionary innovation in terms of both aesthetics and technology. The series offers the additional advantage of not dispersing the cold even with numerous openings throughout the day. Equipped with a practical removable container (BRK35 and C47 CHR), they occupy limited space, while maintaining excellent usability.

\* Codes ending with CHR suffix refer to the Chromelock series. The same codes without the CHR suffix refer to the Airlock series. Eg. C115iA -> Airlock series; C115iA CHR -> Chromelock series.

I codici che terminano con il suffisso CHR si riferiscono alla serie Chromelock. I medesimi codici senza suffisso CHR si riferiscono alla serie Airlock. Ad es. C115iA -> serie Airlock; C115iA CHR -> serie Chromelock.
